DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-43 are rejected under 35 U.S.C. 102(e) as being anticipated by Linares et al. (6,264,626).

With respect to claims 1-4, 25, 34, and 41, Linares discloses a tampon applicator assembly 1, as shown in figure 1, comprising a barrel 10, a plunger 70, and a pledget. The barrel 10 comprises a first region 61, a second region 60, and a gripping region 62 therebetween. The first and second regions 60 and 61 each have an outer dimension about 15-25% larger than the gripping region 62, as described in column 3, lines 56-68.

With respect to claims 5, 11-13, 23-24, 32, and 38-39, the barrel 10 is at its maximum dimension about 55% to 85% of the length from the insertion tip 41, as shown in figure 1.

With respect to claims 6, 8, 14-15, 17-18, 21-22, 29-30, 33, 40, and 42-43, the main section of the barrel has a taper at the insertion end of between 1.07 and 1.15, as shown in figure 1.

With respect to claims 7, 9, 10, 16, 19, 20, 26-28, 31, and 35-37, the insertion tip

41 comprises a plurality of petals 40, the petals 40 having a length-to-width ratio of at least 2, as measured from figure 1.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents 6,368,442; 6,478,764; and 6,423,025 disclose tampon applicators having finger grips, petal, and tapered insertion ends.
